

European Transport Research Review – Facts and figures at a glance

A peer-reviewed open access journal publishing original high-quality scholarly research on and developments in areas related to transportation science, technologies, policy and practice, covering all modes of transport.

Since its launch in January 2009: over **200 articles**

More than **100,000** article accesses in 2016

IF 0.672

European Transport Research Review is affiliated with the European Conference of Transport Research Institutes (ECTRI)

Indexing services:

Science Citation Index Expanded, Journal Citation Reports/Science Edition, Social Science Citation Index, Journal Citation Reports/Social Sciences Edition, SCOPUS, Google Scholar, Academic OneFile, Current Contents / Social & Behavioral Sciences, Current Contents/Engineering, Computing and Technology, DOAJ, EI-Compendex, OCLC, SCImago, Summon by ProQuest, Transport Research International Documentation (TRID)

Editor-in-Chief:
Prof. Dr. Ing. Karst Geurs
University of Twente, NL

 **Fully Open Access**
Read online

Most read paper in 2016:

Study and the effects of ignition timing on gasoline engine performance and emissions

Topics covered:

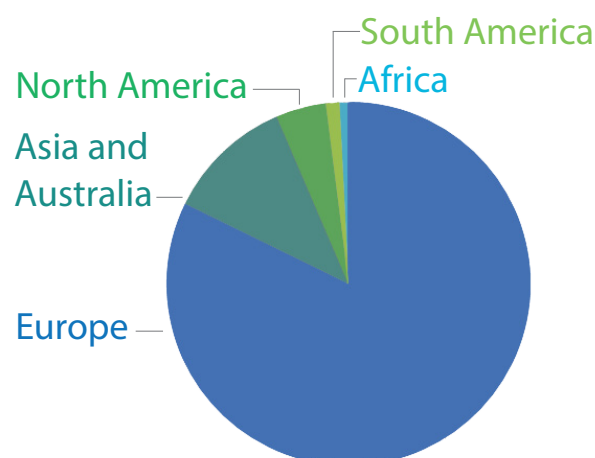

All topics related to transportation in engineering and the social sciences

The journal addresses the needs of:

Researchers, practitioners, engineers and policymakers

+ Most shared and discussed paper:

A multi-modal network approach to model public transport accessibility impacts of bicycle-train integration policies

Regional focus:

Europe
BUT also of interest to anyone developing new applications for the European practice or wishing to learn from European experiences.
