European Transport Research Review

An Open Access Journal

*Now indexed by Thomson Reuters
(First Impact Factor in 2017)*

Editor-in-Chief: A.D. May, University of Leeds, UK

- ▶ International open access journal on transportation, with a special focus on **European transport policymakers and the transport research community**
- ▶ Bridges the gap between **social science research and engineering practice** on transportation
- ▶ Covers all disciplines within the social sciences and engineering as applied to transportation
- ▶ Reports on **all modes of transport**
- ▶ Intended to foster the **application** of research outcomes to mainstream transport policy and practice
- ▶ Provides an opportunity for thematic collections from **major European projects**, the European Transport Research Arena and the European Transport Conference

European Transport Research Review (ETRR) is a peer-reviewed open access journal publishing original high-quality scholarly research and developments in areas related to transportation science, technologies, policy and practice. Established in 2008 by the European Conference of Transport Research Institutes (ECTRI), the Journal provides researchers and practitioners around the world with an authoritative forum for the dissemination and critical discussion of new ideas and methodologies that originate in, or are of special interest to, the European transport research community. The journal is unique in its field, as it covers all modes of transport and addresses both the engineering and the social science perspective, offering a truly multidisciplinary platform for researchers, practitioners, engineers and policymakers.

ETRR covers the following main areas of interest: Freight transport and logistics; Transportation infrastructure; Mobility and transport behavior; Transportation ergonomics and human factors; Transportation safety and security; Transportation planning and policy; Transportation economics; Transportation system management, including Intelligent Transportation Systems; Environmental issues in transportation and climate change; and Vehicle design & technology. Highway engineering, railway engineering, waterway transportation and air transport also fall into the journal's scope. Of particular interest are topics like: transportation sustainability; accessibility and equity; technologies for improving network and vehicle efficiency; advances in integrated transport systems and intermodal transportation; traffic flow theory and modeling; IT technologies for transport data collection and analysis; innovative vehicle design; and strategies for vehicle-to-vehicle communications. The Journal encourages thematic collections of related articles from major European transport research projects, major conferences such as the TRA, ETC and WCTR, and international networks such as NECTAR.

ETRR is aimed at a readership including researchers, practitioners in the design and operation of transportation systems, and policymakers at the international, national,

regional and local levels. While its focus is on Europe, it will be of interest to anyone wishing to learn from European experience or to develop new applications for European practice.

Advisory Board

Jardar Andersen, TØI, Norway
Maria Boile, CERTH/HIT, Greece
Rudolf Cholava, CDV, Czech Republic
Antoine Frémont, IFSTTAR, France
Frank Heymann, DLR, Germany
Bin Hu, AIT, Austria
Jeppe Rich, DTU, Denmark,
Joachim Winter, DLR, Germany

Associate Editors

Dietmar Bauer, University Bielefeld, Germany
Magnus Blinge, Chalmers University of Technology, Gothenburg, Sweden
Laurent Carnis, French Institute of Science and Technology for Transport, Development and Networks, France
Pierluigi Coppola, Università degli Studi di Roma "Tor Vergata", Roma, Italy
Karst Geurs, University of Twente, Enschede, The Netherlands
Natasha Merat, University of Leeds, Leeds, UK
Peter Wagner, Deutsches Zentrum für Luft- und Raumfahrt (DLR), Berlin, Germany

Editorial Board Members

Georgia Aifadopoulou, Centre for Research and Technology Hellas; Hellenic Institute of Transport (HIT), Greece
Elisabete Arsenio, Laboratório Nacional de Engenharia Civil (LNEC), Portugal
Steven Beningo, United States Department of Transportation, USA
Patrick Bonnel, Ecole Nationale des Travaux Publics de l'Etat (ENTPE), France
João Cardoso, Laboratório Nacional de Engenharia Civil (LNEC), Portugal
Uwe Clausen, TU Dortmund University & Fraunhofer Institute for Material Flow and Logistics, Germany
Floridea Di Ciommo, Centro D'Innovació del Transport (CENIT), Spain
Manfred Dangelmaier, Fraunhofer Institut für Arbeitswirtschaft und Organisation, Germany
Marco Diana, Politecnico di Torino, Italy
Sigurdur Erlingsson, Swedish National Road and Transport, Research Institute & University of Iceland, Sweden
El-Miloudi El-Koursi, French Institute of Science and Technology for Transport, Development and Networks
O. A. Elrahman, Rensselaer Polytechnic Institute, USA
Péter Holló, Institute for Transport Sciences Non-profit Company (KTI), Hungary
Inger Beate Hovi, Institute of Transport Economics (TØI), Norway
Dewan Md Zahurul Islam, University of Newcastle (UNE), UK
Marco Mazzarino, Università IUAV di Venezia, Italy
Michael Meyer zu Hörste, German Aerospace Center (DLR), Germany
Roberto Montanari, University of Modena and Reggio Emilia, Italy
Andrés Monzón, Universidad Politécnica de Madrid (UPM), Spain
Chris Nash, University of Leeds, UK
Mary Panou, Centre for Research and Technology Hellas; Hellenic Institute of Transport (HIT), Greece
Andrew Parkes, Coventry University, UK
Karel Pospíšil, Transport Research Centre (CDV), Czech Republic
Cristina Pronello, Politecnico di Torino, Italy
Charles Raux, Laboratoire d'Economie des Transports (LET), France
Petr Senk, Transport Research Centre (CDV), Czech Republic
Yannis Tyrinopoulos, Technological Educational Institute of Athens, Greece
Knut Veisten, Institute of Transport Economics (TØI), Norway

European Transport Research Review - Funding information

European Transport Research Review (ETRR) levies an **article-processing charge (APC)** of **EUR 1050** for each article accepted for publication. However, there are different ways in which these charges can be covered, so please consider using these. The main scenarios are listed below, with an indication of the action which you should take for each:

1. **If your Institution is a member of SpringerOpen**, the cost of the APC is covered by this; click **OPTION 4** at the end of the submission process;
2. **If your Institution is a Supporter Member of SpringerOpen**, a discount is available; click **OPTION 4** at the end of the submission process;
3. **If you as lead author are from a low-income country**, SpringerOpen routinely waives the APC; click **OPTION 3** at the end of the submission process;
4. **If you as lead author are a research student**, SpringerOpen may waive the APC; click **OPTION 3** at the end of the submission process;
5. If you are eligible for **support for your APC from your Institution or research funder** (e.g. EU FP7, Horizon 2020, Research Councils UK) please take advantage of this funding; click **OPTION 2** at the end of the submission process;
6. **If your Institution is a member of the European Conference of Transport Research Institutions (ECTRI)** the cost of the APC is covered by ECTRI; **please ask the Editor-in-Chief** (a.d.may@its.leeds.ac.uk) for the submission code; click **OPTION 1** at the end of the submission process, and use the submission code as "BioMed Central account number" when asked;
7. **If your article is not covered by one of the above**, ECTRI provides up to 60 submission codes per year on a first-come, first-served basis; **please ask the Editor-in-Chief** (a.d.may@its.leeds.ac.uk) for the submission code; if you obtain one, click **OPTION 1** at the end of the submission process, and use the submission code when you're asked to insert a "BioMed Central account number"; if you are not given a code you will need to pay yourself; click **OPTION 2**.

PAYMENT OPTIONS THAT WILL BE SHOWN AT THE END OF THE SUBMISSION PROCESS

- **OPTION 1:** I am a member of European Conference of Transport Research Institutes (ECTRI) and believe that I am covered by their membership arrangement. Please use this for scenarios 6 and 7 above.
- **OPTION 2:** I accept responsibility for paying the £825/US\$1,290/€1,050 processing charge on this article
- Please use this for scenario 5 above. If you choose this option, if your manuscript is accepted, you will be able to pay by credit card, cheque, purchase order, or institutional invoice, using personal, grant or institutional funds.
- **OPTION 3:** I would like to request a waiver of the article-processing charge for this article
- Please use this for scenarios 3 and 4 above. Waivers may be granted in the case of genuine inability to pay. If you are requesting a waiver, you must explain in the box below the reason(s) for your request, giving details of how your research has been funded. The names and affiliations of all authors and all sources of funding that contributed to this study should be detailed. SpringerOpen routinely waive charges for authors from low-income countries. Any authors submitting from countries listed in the SpringerOpen waiver fund (<http://www.springeropen.com/authors/oawaiverfund>) are recognised at submission and automatically granted a waiver.
- **OPTION 4:** I believe that I am covered by an institutional membership arrangement and wish to request institutional payment or discount (as applicable). Please use this for scenarios 1 and 2 above. If your institution is a member of SpringerOpen, the cost of the APC is partially or entirely covered by the membership. In this case, add the SpringerOpen account code or select your institution from the list.
- For more information about the membership programme, please visit our website: <http://www.springeropen.com/libraries/membership>
