Introducing

European Transport Research Review

An interdisciplinary refereed journal that solicits original research contributions addressing the sector of transport in Europe

Indexed by Thomson Reuters
IMPACT FACTOR: 1.727

More than 345,000 article accesses in 2018

Established by:

ECTRI

Editor-in-chief: Prof. dr. ing. Karst Geurs
ISSN: 1866-8887 (electronic version)
Published by: Springer-Verlag Heidelberg
Website: https://etrr.springeropen.com/
Submissions: www.editorialmanager.com/etre
Areas of interest

- Mobility and travel behavior
- Transportation safety and security
- Transportation economics
- Transportation planning and policy
- Human factors in transportation
- Traffic and demand management
- Air and waterway transport
- Freight transport and logistics
- Intelligent Transportation Systems (ITS)
- Transportation impacts of emerging vehicle technologies
- Environmental issues in transportation and climate change
- Equity, social and health issues related to transport

About the Journal

The European Transport Research Review – An Open Access Journal (ETRR) is an online scientific platform aiming at disseminating research results in the field of transport. The main goal of the Journal is to provide a forum for the publication of high quality scientific papers in the field of transport in general, and a dissemination medium for new ideas and developments that originate in, or are of interest to, the European transport research community. The Journal was established by the European Conference of Transport Research Institutes (ECTRI - www.ectri.org).

There are three aspects of the Journal’s concept that mark a distinct difference to the other journals in the field of transport; first, it is the open access configuration that makes it easily and widely available through the internet to all researchers and practitioners with a minimum of constraints and costs; second, it provides focus on issues of special interest to European transport research, its funding bodies and supervising organisations; third, it is clearly oriented towards researchers and practitioners as well.

The Journal considers primarily papers, on both theoretical as well as applied research, whose excellence and content represent an important contribution to transport research in Europe. Papers dealing with theoretical or applied research outside Europe are also encouraged to be submitted for publication, as long as their results are of relevance to European transport concerns, or can contribute to scientific knowledge or best practice transfer between researchers in Europe and their counterparts in other continents.

Contributors are advised to submit papers that fit at least in one of the areas of interest identified by the Journal. However, the Editorial Board can also consider papers that are not directly related to these areas but are considered of interest or of particular concern to the aims and goals of the Journal. Papers published in the Journal are subjected to peer-review in accordance with standard international practices for scholarly journals. In addition, the Journal will also periodically publish information papers, as well as book and conference reviews regarding transport policy and research in Europe.

Proposals should be submitted through the “Online Submission System”, which is accessible at: www.editorialmanager.com/etre

For all enquiries about content or submissions, please contact the Editor-in-chief at: k.t.geurs@utwente.nl
